

TESLAPICKUPS ORIGINAL GUITAR PICKUPS - HUMBUCKER

OPUS-1

The dream of every guitar player who seeks the ultimate sound is our OPUS-1 pickup! The OPUS line of pickups feature our latest innovation in pickup manufacturing producing a pickup that we proudly present as the pickup that is "Better than hand-wound". Performance, precision, sound and tonal re-production are perfected because of our intensive research and our dedication to perfection! The OPUS-1 features lows that are warm and well defined the mid-range is smooth and a delicate highs that are clear and sharp but not too bright power where and when you need it! The OPUS-1 is carefully made with plain enamel copper wire and type alnico 5 magnets. The coils are wax potted for stabilization to insure the complete clean reproduction of sound. Equipped with 4 wire leads that give the player endless tonal possibilities.
